

Indoor Vertical Bike Racks

For space-saving bike storage indoors, here is a range of Vertical Bike Racks. These have an innovative and patented mounting hoop that secures the bike in a vertical position. This saves 35-45% of the floor space required if bikes are stored horizontally and avoids the common problem of bikes leaning against each other.

Vertical Bike Racks are ideal for storing bikes, when space is at a premium.

Vertical Bike Wall Hoop

- Simple cost-effective means of storing one bike vertically
- Patented hoop mechanism holds bike securely in place

- Patented hoop mechanism holds bike securely in place
- Ramp to ensure rear mudguard does not touch ground
- Saves floor space
- Supplied with rawl-bolts to fix to ground

CODE	PRICE
SRAVERTACKD	£216.00

QUICK AND EASY OPERATION

- 1 Ensure wheel-mounting hoop is at top of runner, apply rear brake and pull handlebars back until bike is vertical
- 2 Free-wheel bike forwards. When bike meets wall, wheel hoop slides down over front wheel to hold bike
- 3 Secure bike with chain provided (dependant on model)
