

Oracle can respond to any demands for usage and security. We are a trusted supplier to all industries – from traditional industrial companies requiring high flow through and volume, to aerosol and high value storages. Just let us know whatever you require – *we offer you the complete solution.*

Oracle delivers - Optimized storage areas.

Oracle Caelum gives a storage area individually designed for your specific requirements. Quality guaranteed, and easy to erect. Choose between *Caelum UR350* and *Caelum UX450* for different security levels.

Simplicity

Oracle Caelum is made and delivered according to your specifications, from your initial enquiry, until the whole system is installed and functioning to your complete satisfaction. The keyword is simplicity.

Quality Assurance

Oracle Caelum is the result of our long experience and our analysis of all work safety and security measures. One example of this can be seen in the unique mesh structure and construction of the safety protection panels, which give optimal strength and added load support. A small but vital detail in our total concept. Just one of many small details.

Service

Oracle is near you, wherever you are. Our efficient logistics system and rapid response service are all part of our customer care programme.

Scalability

With *Oracle Caelum* you can build different types of enclosures. For example boxes in different sizes to fit your specific requirements. Just choose the function and your level of security. Everything fits together.

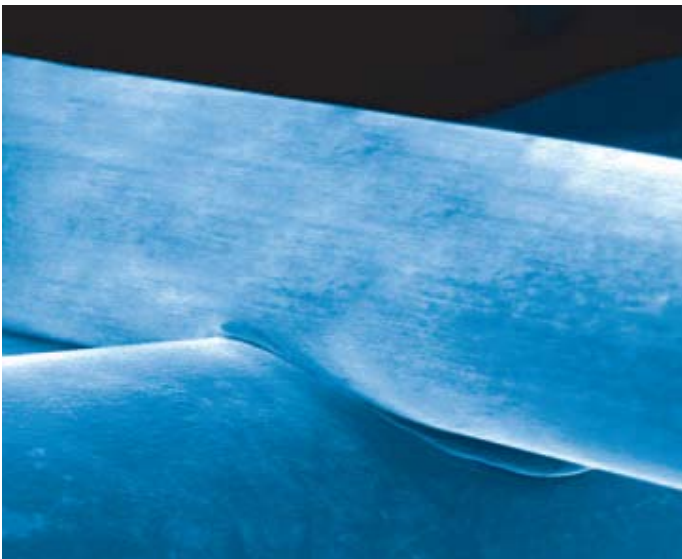

You specify whatever you want – security level, mesh size, type of access doors, colours etc. and leave rest to us. We will give you - *optimum solutions to all your requirements*.

Certified welding quality, our unique method to fix every wire to the frame.

You can use both *Caelum UR350* and *UX450* to create dividing walls.
